PROJECTS

Skysense Weather App

Frontend developer

skills Javascript, HTML, CSS

completed June 3rd, 2023

- **Task:** Create a weather application to provide users with accurate and up-to-date weather information.
- **Action:** Utilized the OpenWeatherMap Weather API to fetch real-time weather data for user-specified locations.
- **Result:** Developed Skysense, an intuitive app that empowers users to access essential weather information, enhancing their ability to plan and stay informed about weather conditions.

CruxTrack Climbing Route Management App

Full stack developer

skills HTML, JS, CSS, Node, Express, EJS, Mongo

completed July 14th, 2023

- **Task:** Implement backend functionality to support user authentication and route management.
- **Action:** Created various backend endpoints, such as login, registration, and route management, utilizing appropriate HTTP methods.
- **Result:** Enabled users to securely log in, register, and access personalized route information, contributing to a seamless and comprehensive climbing route management experience.

Taste Tally App

Full stack developer

Skills: React, JavaScript, Sass

Completed August 30th, 2023

- **Task:** Develop an intuitive recipe application to help users organize and manage their treasured recipes effectively.
- **Action:** Utilized React along with JavaScript and Sass to craft Taste Tally, a user-friendly recipe app designed to simplify the process of documenting and revisiting culinary creations.
- **Result:** Completed Taste Tally, an app empowering users to create a digital log of their culinary creations. With features including detailed recipe entry, a notes section, and a 5-star rating system, Taste Tally enhances the cooking journey for both home cooks and seasoned chefs.
